

TAPS BOB PRATT / BILL MOORE ^{FEB 82}
BILL ~~HAD~~ BACK PROBLEMS 25 YEARS AGO

BOB - DID YOU GET MY LETTER?

BILL - ^{YES, & I HAVE} TENTATIVELY AGREE TO DISCUSS THAT MATTER ON
MARCH 8 (WITH WHO?) / ^{BOB: I'VE FOUND IT DIFFICULT}
^{TO BELIEVE CONTINUING}

BILL - SINCE I'VE SEEN YOU, I'VE HAD A FEW
MORE BITS OF EVIDENCE FALL INTO MY HANDS. ^{CONFIRM THE SAME TIME}
^{I ALMOST CONSIDERED DROPPING OUT OF UFOLOGY ENTIRELY.}

NOTE - TALKING ABOUT ELLSWORTH CASE

BILL - LIBERT BRYANT HAD SOMETHING IN THE MUFON
JOURNAL ABOUT IT A COUPLE OF MONTHS AGO.

ANYBODY WHO READ THIS WOULD KNOW NOTHING
ABOUT THIS CASE WOULD ~~WANT~~ WONDER
WHAT THE HELL HE'S TALKING ABOUT.

HE ASSUMED IT WAS COMMON KNOWLEDGE.

MAYBE THAT'S WHERE IT BEGAN.

ABOUT 4 ISSUES AGO.

BILL - MY FIRST EXPOSURE TO IT ~~WHAT~~ WAS WHAT
I WAS TOLD ABOUT IT.

BOB - REMEMBERING THAT HE MAY HAVE MENTIONED IT
TO TODD ZELTZER AND WAS GOING TO PUT
IT IN A LETTER TO BILL. INTERESTING

BILL - I AM GOING TO GO TO IOWA TO SPEAK ON ^{MARCH} ~~THE~~
10th.

What if there was a real MS-12 group but it had nothing to do with UFOs. By recycling the MS-12 codeword in UFO disinformation, it would have the dual effect of hiding the real UFO program as well as the purpose for the real MS-12 program.

1978 - LEONARD STANFIELD MUFON CONFERENCE PAPER

DECEMBER 1980, NSA DOCS PREVENTED FROM BEING RELEASED BY THE NSA. 21 PAGES TOP SECRET AFFIDAVIT. LATER THE AFFIDAVIT WAS DECLASSIFIED - PLOT TO MAKE IT APPEAR THAT GOVERNMENT WAS HIDING DOCUMENTS?

BILL MOORE MET WITH DOTE ON

8/81

"BOTH THE AIR FORCE + NASA ARE ACTIVELY INVOLVED WITH UFOs AT THIS TIME."

USE OF NASA SIMILAR TO THE ACQUAINTANCE TELETYPE

IN 1982 BILL SAID THAT UFO PROJECT IS

ARMED, CLASSIFIED TOP SECRET WITH ACCESS RESTRICTED TO MS-12 (MS MAY BE MAGIC). THIS PROJECT BEGAN ABOUT 1966.

BUT APPARENTLY INHERITED FILES OF BRANSON PROJECT.

NASA CURRENTLY ACTIVELY INVOLVED THROUGH A COVERT OPERATION MISQUOTED IN THE

US COAST AND GEODASTIC SURVEY BUILDING IN
MARZLAND.

1/15/82

01/02/82 CORRECTIONS AND ADDITIONS TO ORIGINAL NOTES INDICATED IN GREEN.

-1.-

Source of the following information is Richard C. Doty, Special Agent, United States Air Force Office of Special Investigations, Kirtland Air Force Base, Albuquerque, New Mexico. Doty's office phone is (505) 844-2911. His home phone is (505) 255-1076. License number of his official car is DFH 894 (New Mexico). According to the New Mexico State Department of Motor Vehicles, there is no such plate number. License number of his private auto is CZT 875 (New Mexico). Doty's description is about 5'9", 165-170 pounds, black hair, dark complexion, given to wearing sun glasses, moustache. He holds a military rank which he says is "classified". I have never seen him in uniform. Meetings took place 9/80, 2/81, 8/81. Also several phone conversations, most notably one on 5-8-81.

1. Both the Air Force and NASA are actively involved with UFOs at the present time. Reports of UFOs which seem to be of military or national security interest are funnelled through Air Force OSI or the Foreign Technology Division at Wright-Patterson AFB directly to D.C., and from there to the NASA people. Reports are all classified and nothing is released to the media.

01/02/82

probably

2. CIA either has custody or copy of report on crashed saucer. This is a thick volume which is very highly classified even to the extent of cipher-coded names, places and dates. A separate document is required to decipher these codes, and of course this separate document is even more highly classified. The report in question deals with metallurgical analyses, structural analyses, autopsies, and propulsion theories. Aliens are described generally as short, virtually hairless, with one heart-lung organ, a simple digestive tract which is functional but less complicated than human, no kidneys, a bladder with an attached organ (apparently kidney-like), a complex and highly convoluted brain, and an organ of some sort associated with each limb. Humanoid, but not human.

01/02/82

Govt. (President + NSC)

3. A.F. UFO project is Aquarius, classified Top Secret with access restricted to MJ 12. (MJ may be "magic"). This project begun

about 1966, but apparently inherited files of earlier project. Many AF

01/02/82

Current files maintained by OSI, Bolling AFB, D.C. in several filing cabinets.

4. NASA currently heavily involved through a covert operation headquartered

in the U.S. Coast and Geodetic Survey building in Maryland. The A.F. is currently funnelling data to this operation through OSI. NASA project's name is Gold Chariot. Highly classified. Have used the USCGS address since about '74. Prior to that, they operated out of a Manhattan address.

5. The Pecos incident (see letter attached) is confirmed. It was thought security was tight on this one, but there was a leak. All men involved had been required to sign security statements. "Mr. Huck" even baffles OSI people. They thought he might be connected with Los Alamos, but there is no record of him on either classified or unclassified registers there. Later investigation turned up a CIA connection operating under an assumed name. CIA's response was that individual was working on his own and did not represent them official

Photos involved were "excellent"- even to one showing humanoid 50-75 yards off with clear detail of creature and craft. Craft markings were visible. These were sent to D.C. and never returned.

Col. Purvine has had four UFO sightings himself, two of which were reported as "hostile". He did indeed make the statement that there was a UFO stored in Manzano Base, and it was suggested to him subsequently that it was "unwise to spread rumors".

6. Some pilots have been instructed in the past to make reports of "Angel Fire" (UFO) sightings by tuning to special radio frequencies, reporting Angel Fire, and then standing by for special instructions as to how to proceed. The frequencies in question are dependent upon the location of the aircraft at the time. Upon landing, the pilots are told to report to the base commander directly. Base Cmdr notifies OSI who investigates. Gun camera and any other photos are confiscated at once and sent to D.C. Pilots are required to sign security statements.
7. President Carter requested full UFO briefing in April of 1977 from NASA. Session held with only 4 or 5 in attendance on 6-3-77. 1/02/82
The decision was to maintain the status quo and tell the public nothing. (see item (7) addendum attached.)
8. Jim Oberg is being used to NASA's advantage. He knows nothing of the covert work, but is being encouraged to spread his personal skepticism as far as possible.

Digest of Other White House Announcements

Following is a listing of items of general interest which were announced to the press during the period covered by this issue but which are not carried elsewhere in the issue. Appointments requiring Senate approval are not included since they appear in the list of nominations submitted to the Senate, below.

May 31

The President returned to the White House following a Memorial Day weekend visit to Georgia.

June 1

The President met at the White House with:

- Zbigniew Brzezinski, Assistant to the President for National Security Affairs;
- senior White House staff members;
- Col. Leonard J. Riley, Commander of the White House Communications Agency;
- Edmund D. Edelman, member of the Los Angeles County Board of Supervisors;
- Representative Butler Derrick of South Carolina;
- Charles L. Schultze, Chairman of the Council of Economic Advisers;
- Thomas P. O'Neill, Jr., Speaker of the House of Representatives.

June 2

The President met at the White House with:

- Dr. Brzezinski;
- members of the Energy and Power Subcommittee of the House Interstate and Foreign Commerce Committee;
- Secretary of the Interior Cecil D. Andrus and a group of Congressmen, to discuss national minerals policy;

- Assistant to the President James R. Schlesinger, from whom the President had requested a briefing on the latest advances and prospects in research and development operations in the energy field;
- Representative Fernand J. St Germain of Rhode Island;
- Bert Lance, Director of the Office of Management and Budget;
- a group of administration officials, to review the budget for fiscal year 1979;
- Secretary of Defense Harold Brown.

The President today declared a major disaster for the State of Georgia because of damage to shrimp resources as a result of severe cold weather beginning about January 14, 1977, which adversely impacted on the shrimping industry and resulted in substantial unemployment in shrimping related businesses. The President's action will permit the use of Federal funds in relief and recovery efforts in designated areas of the State during the period May 13–September 13, 1977.

June 3

The President met at the White House with:

- Dr. Brzezinski;
- members of the House Ways and Means Committee;
- a group of administration officials, to review the budget for fiscal year 1979;
- Don Ladd, Lee Roderick, and Thomas Daniels of the Church of Jesus Christ of Latter-day Saints;
- Vice President Walter F. Mondale, Adm. Stansfield Turner, Director of Central Intelligence, and Dr. Brzezinski;
- Representative Ronald V. Dellums of California;
- a group of administration officials, for further discussions of the budget for fiscal year 1979.

The President has appointed Henry Ford as U.S. National Chairman for United Nations Day 1977.

9. (Info. in this paragraph via Dr. Henry Monteith, a physicist employed at Sandia Special Weapons Center outside of Albuquerque.). 2/81

There are two crashed saucers in A.F. custody. One is mostly wreckage and was picked up in N.M. a long time ago. The other is fairly well intact and was recovered in Arizona in the early '50s. Both are stored at Camp Peary in Virginia. Peary is a training area for intelligence agents, primarily CIA, but others also. There is a large building at the north end which is maintained under high security. Foreign aircraft, tanks, etc. are kept here, and possibly saucers too. Bodies are now crated individually and stored in an area with many other crates and boxes. Identification is by number only. (Note: this info. came to me well before the release of the film Raiders of the Lost Ark wherein at the end of the film the Ark is stored under similar circumstances.)

10. Some A.F. documents relating to the Socorro-Zamora case are still classified. These relate to soil analysis, additional witnesses (the civilian who stopped at the gas station and also a beer truck driver from ABQ who was driving south at the time and saw the object take off), and the insignia on the side of the craft. This same insignia had been reported previously in several cases which had not received any publicity. A sample of some of the residual material picked up is attached in a small brown envelope.
11. At one point, Doty requested Blue Book documents from Wright-Patterson relating specifically to Southwestern sightings. He got back quite a stack. Many of these were still classified. One document referred to a report sent to "OCA" for investigation. He says he does not know what OCA is (or was), and has not seen any other reference to it.
12. Some of the cases still classified referred to MIBs. Apparently AF was baffled by some of these cases.

more....

13. One unusual case- a report from a former Colonel at Kirtland- took place in '55 or '56. Col. was flying from Kirtland to Walker (Roswell) with 2 others, a sargeant and a lieutenant. During the flight, their plane was followed most of the way by an object which landed at the end of the Walker runway when they arrived. They exited the plane, grabbed a nearby jeep, and approached the object. There were a series of "hypnotic" lights, and then object was gone. All three debriefed. Col. got phone call about two weeks later from "one of them" wanting to know if he had reported occurrence. He replied that he had to. Col. was killed two years later over Japan. Doty says he can supply names of other two men, but has not done so as yet.
14. Regarding the Paul Bennewitz affair, NASA was actively watching him and monitoring activities. (Refer to Jim Lorenzen of APRO for more detail on this.) Apparently Bennewitz is on to something but doesn't realize it. Bennewitz was gullible, and they discredited and neutralized him by feeding him disinformation and letting him hang himself with it. He never did know what it was he was on to, and neither do I. NASA got copies of all his photos and much of his instrument data. Doty has urged me on a couple of occasions to get in touch with Bennewitz, but I have resisted this. Documents and communications regarding this case are classified Top Secret. I have seen one.
15. On 5-8-81 two fellows showed up in Doty's office giving names of Larry Ruloge and David Rivan. Showed ID cards from "Aerial Phenomena Research Associates, Columbus, Ohio". Driving a rental car (AVIS), and had flown in to ABQ on Frontier flight to Denver. Card was black letters on bluish background and looked crudely done. They demanded information on a ret'd. A.F. Lt. Col. Merle Borlage who was last known in Socorro. Borlage had supposedly investigated a crash of some sort of object in New Mexico back in late 50s or early 60s.

There is no hint as to who these two fellows might be. No record of any such in APRO, MUFON or CUPOS files, nor in phone info for Denver, Columbus or Albuquerque. Neither Len Strignfield, STF Jerry Clark, Bob Pratt or Warren Nicholson (who lives in Columbus) has ever heard of them. Best guess is that they were connected

in some way with Charlie Tucker, Intl. UFO Bureau, Sturgeon, MI 219-293-3881, a ret'd AF officer who has made trouble for the AF. in the past concerning UFOs. (Tucker is fried because the AF would not allow him to publish a UFO book without heavily censoring its content first.)

There is a Merle Borlage who ret'd. from AF intelligence at Walker in 1964. He did retire to Socorro, but is now living in ABQ because of ill health. Borlage was interviewed by Doty on 5-12-81. Results as ff:

Time was December, 1958, just before Christmas. Borlage (Maj. at the time) and a Sgt. whose name he didn't recall (both were w/ 1157th Tech. Oper. Squadron) dispatched to site near Socorro. They assisted in recovering an object which had crashed and broken into two pieces, one saucer-shaped, one badly bent up. There were two others at site also; one civilian and one mil. man out of White Sands. There was a design on object, but he couldn't recall what. A truck arrived, and objects were hauled to Walker. In Jan. of '59 a Col. debriefed him and told him he had seen a "super secret craft" which he was not to mention-- ever. He never did mention this to anyone after that, and can't imagine who could have put his name forward on this.

Borlage did live in Socorro as an accountant, but now in ABQ for health.

He declined to discuss the story with anyone non-military. He said that he had been debriefed, and that it was his patriotic duty to shut up.

Rough location of crash was the Chupadera Mesa Southwest of Blanch, NM. Obj was metallic and shiny. Very heavy, about size of VW auto, saucer shaped with a bulb on top and bottom, but bottom bulb had broken off and was lying about 25 yds away. No one checked for occupants. When picked up, there was a large black splotch of residue on the desert. A chemical engineer scooped up some of this for analysis. He was with convoy of 5 trucks brought out. Borlage could not recall name of engr, but only that he was assigned to Walker. Borlage assumed at the time that obj was from White sands, and only later began to wonder if it had been a UFO.

Regarding Ruloge and Rivan, a "national agency check" on the two came back negative.

turn...

16. Doty says he has a copy of a 1981 report (March) which is essentially a summary of significant sightings of aerial phenomena over CONUS (Continental US) for year 1980. Both report and title are classified Info in this report compiled by civilian who is associated with one of the civilian UFO groups. CUFOS is specifically mentioned in report.

- 1/02/82 17. There is an AF reg. numbered AFR 200.23, ^{one section of which is entitled} ~~entitled "Project"~~ "NICAP" ^{Secret,} which is classified Secret. It contains five paragraphs, 1 ~~classified~~ ^{identification and} four for official use only. Deals with reporting of UFO sightings ^{and} ^{1 confidential and three} ^{sightings of foreign aircraft} by pilots and receipt of information from civilian agencies and group. Apparently AF has been using civilian agencies as source of info on civilian sightings. Reg has been in effect since '65 with several revisions. See also item # 200.23 (2 pgs.) attached.

18. More on Socorro/Zamora: Traveller witness was found by AF and supposedly silenced. NMIMT soil analysis was performed under OSI supervision. Results were classified. Doty wanted to know how I found out on this one.

There were also two apparent radar confirmations of the case, one from White Sands and one from Walker.

Beer truck driver (Beer Distr. truck) was going south along hwy when he also witnessed object taking off. His report surfaced two days later via State Police to AF. Driver was interviewed by OSI (1059th was involved). Man sworn to secrecy. He did not know what he had seen.

19. More on Weitzel letter: This case was well covered by AF. Bill English (he was not named, only alluded to) caused a lot of trouble. The answers given to Bob Todd were all fabricated. Doty wanted to know who Todd was working for.

20. "Project Blue Room" (see Goldwater material in Roswell) was a medical technology research at WPAFB having to do w/ aliens. Highly classified. Unusual involvement during VietNam war w/ bodies of enemy w/ unusual physical characteristics. These found in jungle & resembled aliens. There was also a report about N. Koreans trying to develop super race. Some bodies were examined by Blue Room in that context also. All reports classified. more--

Item #200.23

(2 pages.)

Information obtained from Doty regarding AFR 200.23:

This is a legitimate AF regulation containing five sections, three of which are "Official Use Only", one of which is "Confidential", and one of which is "Secret". The title of the regulation is also "Secret".

This regulation has nothing to do with the "East-West Exchange Program" but rather has to do with pilot procedures for identifying and reporting foreign aircraft, UFOs, etc. The regulation was initially issued in 1965, and has been revised several times since.

The "Secret" section is entitled "National Intelligence Communications Alert Procedure (NICAP)", not "Project NICAP", and has nothing to do with the old NICAP UFO organization.

Doty knew nothing about the allegedly "anonymous" letter from Bolling on this subject.

At Bob Pratt found phone listing for O'Brien, talked to him + got no info
re: O'Brien, from UFG etc.

REPLIES TO UFO REPORTS

PURPOSE: THE SENIOR DIRECTOR, INFORMATION OFFICER, AND SP's CONTINUE TO RECEIVE UFO REPORTS FROM LOCAL CITIZENS. TO ALLEVIATE THE SD's PROBLEM, THE INFORMATION LISTED BELOW WILL BE PASSED TO INDIVIDUALS MAKING UFO REPORTS.

PROCEDURES:

"THE AIR FORCE NO LONGER INVESTIGATES UFO REPORTS SINCE THE TERMINATION OF PROJECT BLUE BOOK IN 1969. IF YOU FEEL THAT SOMETHING OF SCIENTIFIC IMPORTANCE EXISTS, YOU MIGHT CALL UMD SCIENCE DEPARTMENT. IF YOU THINK IT WARRANTS, CALL THE LOCAL POLICE DEPARTMENT. WE ALSO HAVE A GENTLEMAN YOU CAN CALL WHO REPRESENTS THE MUTUAL UFO NETWORK WHICH INVESTIGATES UFO SIGHTINGS. HIS NAME IS RONALD ANDERSON. HIS PHONE IS AC 715 723-1729 (CHIPPEWA FALLS, WI) YOU CAN CALL HIM COLLECT."

NOTE: IT IS IMPORTANT TO STRESS THAT THE AIR FORCE HAS NO OFFICIAL INTEREST IN UFOs. WHILE, AT THE SAME TIME TRYING TO HELP THE CALLER.

SEE ATTACHED INSTRUCTIONS.

CALL 529-3200 for NCOC UFO CONFERENCE LOOP.

NOTICE: UNTIL NORAD/DO MSG 13/1617Z nov 75 IS UPDATED OR CLARIFIED. THE RCC WILL SUBMIT UNKNOWN REPORTS UTILIZING (23) NR (DOC) FM 10 ON ALL, REPEAT ALL UFO/UNKNOWN OBJECT INFORMATION NO MATTER WHAT THE SOURCE MIGHT BE -- CIVILIAN OR MILITARY.

MAKE CERTAIN THAT THE NCOC IS ADVISED THAT THE REPORT IS A "UFO" AND NOT AN "UNK" IF WE DON'T SCRAMBLE OR DIVERT. OBJECT WILL BE DECLARED "UNK" ONLY IF WE SCRAMBLE OR DIVERT. WHEN WE CALL IN THE REPORT REQUEST THAT NCOC PASSES THE INFORMATION TO NCOC INTELLIGENCE.

A

Information relating to attached documents:

NCOC= Norad Central Operations Center

NORAD/DO MSG 13/1617Z nov 75= Norad (DO is section or unit), message of November 13th, 16:17 hours (Zulu), 1975.

23 NR (DOC) FM 10= Document number 23, form 10

This apparently relates to DOD Collection Requirement 23 (CR-23) which deals with collection and transmission of information related to UFOs and national defense. Note the appearance of this number 23 on the attached British document as highlighted in yellow. Either this British item is authentic, or it is a clever forgery by someone who knew about CR-23. (Note that this item came from von Keviczky/ICUFON).

There are also USAF HQ CR-44 which deals with collection and transmission procedures for photographic data concerning UFOs; and HQ CR-51 which is UFO related but deals with some other (not presently known) aspect.

Doty has indicated he will try to find out the meaning of the British item. A copy of this was passed to him on 12-30-81.

"Cybertech link" is an intelligence transmission system involving not only encoding, but also use of several different methods of transmission each one of which carries only a part of the entire message.

01-02-82

21. Army Project "Silver Sword" involved firing artillery projectiles at unusual metal which had been picked up "somewhere". Project dates from 1960s.
22. Project "Seven Doors" (AFOSI files): Every seven years a convening of scientific personnel for purpose of reassessing information available on UFOs. Reevaluation of technology is made to see if we can understand anything more from crash-retrieval objects. In essence, this project is the "on-going analysis of recovered craft & alien technology".
23. Project "Sky Spot" (NASA/CIA) involves use of classified satellites which monitor UFO activity. Info is relayed to NASA receiving station in Australia, then on to Langley.

(NOTE) Former CIA agent Jim Sweet of Scottsdale, Arizona, has confirmed the existence of this project. He says it was a '60s effort which "has undergone several stages of evolution since then". Name is no longer Sky Spot.

24. HQ CR-44 (Collection Requirement document) AFOSI procedures for collecting ~~data~~ ^{data} on UFOs from ^{civilian and} AF personnel. Concentrates on sightings over or near military installations or govt. bases. Document is classified.
25. HQ CR-51 (Collection Requirement document) AFOSI procedures for collecting and forwarding data obtained via civilian UFO agencies.
26. Project "Rainbow": ECM (EC 135) aircraft flew patterns over a specific area because of increased UFO activity there. Pilots and ECM crew obtained photos and audio recordings of transmissions which apparently originated from UFOs. Location of area in question was not revealed. Project & reports still classified.
27. More on Paul Bennewitz: He was onto something UFO related which attracted interest of "government" people who thought he might have more than he did. Had he kept up his work, he would have made a "significant discovery", but he was gullible type and they used this to discredit and discourage him.

28. Regarding funny business on my/his phone lines, Doty said he was able to determine that this was initiated by ABQ atty named Darrell Rosenberg, who used a P.I. named Ortega to obtain info from phone company. Phone call to me was prob. Ortega's wife or Rosenberg's secy. Not govt., says Doty, but doesn't know yet who they were working for. Possibly a civilian group who is jealous. Says he will try to pursue this further.

I checked ABQ phone book, but could find no atty. listed with above name. (8-81)

29. Doty suggests check of NASA organizational chart. There is, he says, a NASA Intelligence division, and a NASA Special Projects division. It is these areas which are into UFO investigations, among other things. Note on chart that these two units do not list a location or a department head.

Deputy Dir of Research & Development (apparently for Spec. Projects) is a Dr. Uhleison, PhD (physics) who was former major or captain in old ATIC. His name does not appear on unclassified register, but there is also a classified register.

There is no Uhleison listed in any of the D.C. area phone books (8-81).

30. One of Paul Bennewitz' friends is a Randell Tallster, an inventor/scientist who lives in the Tucson area.
31. Doty suggests use of FOIA to get reports of "unidentified aerial lights sighted over restricted test range, Kirtland AFB, NM between 8 Aug and 3 Sept, 1980.
32. All FOIA requests should be directed to "HQ AFOSI/XPU, Bolling AFB, Washington, D.C. 20332."

more...

33. 1st week in September, 1981; an air national guard pilot flying a reconnaissance training mission in an A-7 near Dulce, NM (not far from Colo. line) encountered a strange object in the air. He managed to fly a vertical maneuver to take pictures with his on-board camera, a pod type using 8mm motion pix film in color. At the same time, he snapped six 35mm photos with a Canon AE-1 which he had with him in cockpit. 8mms were fuzzy and dark, but 35mms were excellent. Both showed what was clearly the same object. Someone leaked part of the story to channel 7 ABQ news which carried story, but commented that AF would not confirm. AF Intelligence at Kirtland handled case, but Doty said he saw 2 of the six 35mms before all was sent to HQ in D.C.

Doty also said he had lots of calls on sightings in the same area last spring ('81). Also said that there are old indian paintings of objects ("flying fire gods") coming out of mountains in this area. These paintings may be seen in County Court House in Dulce.

34. An August 21, 1972 document refers to a UFO case in Colby, Kansas which involved some law enforcement officers. Sighting took place on August 19th. OSI recovered some debris at a site six miles north of Brownville near St. Hwy 24. Debris sent to McConnell AFB near Wichita, and then on to Kirtland.

This case is fairly well known, but there are no reports of debris recovery in civilian files.

35. Regarding Roswell incident, Doty located and talked to former FBI agent Percy Wyle III, who was at Dallas in '47. (WYLE on FBI Telex sent from Dallas to Cincinnati is same fellow.) Wyle recalls incident but says he "knows only what others told him". He did not see either craft or wreckage, but did see documents referring to the recovered craft. He said he has been "bugged" by numerous people about the case, and was debriefed by both FBI and military intelligence on the matter. Recalls that at first it was thought craft might be something of Soviet origin, but later heard it couldn't be Soviet. Thought someone had said that bodies couldn't be explained in light of Soviet theory, and that was when the lid came down.

Ralph Webster was agent in the area. Wyle thought he lived in

Durango, Colo. at the time, but has since retired. There was a reunion of some sort in '75 and Webster was there along with another fellow named George Martinez who was living near Wichita Falls, Texas. George was a reserve military officer who was a double agent type reporting on military intelligence affairs directly to Hoover. 9/

36. (Following info. from Loren Gross via STF- 9/81:) On a document referring to an August, 1949 UFO case, the District 17 OSI agent was Sheridan W. Cavitt. HQ was Albuquerque. This may be same Cavitt referred to by Jesse Marcel.

From my own sources, I discovered Cavitt retired from the AF as Lt. Col in Dec. of '64. Service number was 456185501.

Doty pointed out that OSI came into existence officially on 11/1/47 with implementation of National Security Act. Most, but not all agents were former members of the Air Investigative Division (AID) of the Army Air Forces.

37. (Following information from Bob Klinn, 10/81:) 13 years ago (1968), Klinn was doing interview for a radio UFO documentary. During the session, an associate mentioned involvement with an AF Project "Silver Lance". (Klinn regards man's name as confidential over the phone, but says he can arrange a meeting face to face in future.) Fellow shut up when he realized that Bob didn't know anything about such a project. He now says it is hard to recall details.

Project was Top Secret and involved a "scrambling situation" where highly trained units of men were available to go after UFOs. Was "outside of Blue Book". Klinn's source, a man in late forties, was not military at all. He related a personal belief that contact has already been made.

Source also talked about a mid '50s AF project involving scientists in Colorado. There were, he says, "lots of people involved who are not talking now". This may be same project which Genl. Doolittle (interview 10/81) said was conducted at Colo. Springs during time he was Chmn of AF Scientific Advisory Board between '55 and '58. Klinn's source said project was directed out of the Pentagon, but HQ in Colorado.

38. Also from Klinn: CIA Project "Chatterbox" was an effort, conducted by two agents, to find psychically oriented individuals supposedly for use in some sort of effort to make contact with aliens.

typed info!

(1)

Information obtained via Special Agent Richard C. Doty, AFOSI, 17th Dist., Kirtland AFB, Albuquerque, NM, at a meeting between myself and Doty which took place in a restaurant on Central Ave. about two blocks east of Girard Ave. in Albuquerque. Meeting took place the evening of December 29th, 1981 between 7:00 PM and 10:30 PM.

(1) Doty said that "local" files on UFOs are not extensive, but that he had located some information that I might be interested in regarding a "Project Silver Sky". He showed me a secret document dated 21 Oct. 1969 relating to this project and indicating that some sort of object referred to as a "spike craft" had been recovered in New Mexico by the AF at that time. Four civilians were named in the document as having been witnesses to this matter. It was indicated that all were debriefed and asked to sign security pledges.

(2) Doty related further details of his interview (conducted under pretense of doing an investigation) with former FBI agent Percy Wyly III. Wyly recalled his involvement in the Roswell Incident quite readily, but said that he had never really known what was going on at higher levels. Wyly indicated that the FBI was cooperating with the AAF fully concerning this matter, and that it was the AAF that was calling the shots. He also said that it had been the FBI who was monitoring the TELEX newswire out of Albuquerque at the time, and that it was them (FBI) who cut off Sleppy's transmission and ordered her not to try to send out the story. This had been done after a high level request from the AAF (Pentagon) to plug up news leaks. He did not know who had initiated the request since he was assigned to Dallas at the time and not New Mexico. Said he had only heard about this later and had seen some documents referring to it.

(3) Stanton Friedman's FOIA communications with AFOSI HQ at Bolling AFB finally struck a nerve in early December, '81. (Refer to copies of Stan's correspondence for details.) As a result, FOI officer Noah Hamilton appealed to his superior (a Colonel) for direction with the result that a communication went out to all AFOSI field offices world-wide spelling out the procedure to be used by them in the event that they received FOIA requests from Friedman. Doty had a copy of this document in his possession (labeled "For Official Use Only") which he permitted me to read. This document was dated 9th December '81.

In response to my question as to why such an extraordinary action had been taken, Doty replied that HQ OSI was reacting to a classified directive from President Reagan last fall (Sept or Oct '81) which ordered that no further UFO data of consequence was to be released under any circumstances. Because of Friedman's persistence, it was feared that he would initiate FOIA requests with each of AFOSI's approximately 160 field offices, and that due to bureaucratic pressures within these offices, someone might slip up and release sensitive or restricted information.

Doty said that Hamilton's statement that all UFO data had been released with the Blue Book material was totally false and that actually there existed filing cabinets full of still classified UFO material as OSI HQ. Doty indicated that he personally had seen some of this material. The policy is to stonewall as much as possible and to lie only when necessary. The justification for non-release of data under the Reagan order would be FOIA exemption "5" (National Security).

(4) With respect to the controversial Cash/Landrum, Dayton, Texas, case, Doty provided the following information which he said he had obtained directly from a Houston OSI agent whom he knows:

The object in question was actually an experimental craft developed jointly by USAF/NASA. The craft, which was under development at Ellington AFB near Houston, had been flown before with a different (conventional) propulsion system. More recently it had been fitted with an experimental nuclear system using a conventional system as back-up. The craft was somewhat circular in shape, and looked like a *thing* *ray* *(fish)*.

On the night in question (December 29, 1980), the craft was to be test-flown from Ellington AFB (a NASA support base near Houston) to Fort Hood (near Waco) with two pilots on board. Early on in the flight, the craft developed problems with its navigational system which caused it to stray from its designated flight plan. Helicopters were called out from Ft. Hood to help guide the craft, but as they were en route, the nuclear propulsion system also failed. The two pilots experienced some problem in trying to start the back-up propulsion system, and had just about decided they would try to ditch into Lake Houston when the back-up fired and the escort helicopters arrived on the scene virtually simultaneously.

There were nine civilians involved in this case. AFINTEL (with one AFOSI agent present) debriefed six of these (including two Texas Highway Patrol officers) and had all six sign security statements. None of these was believed exposed to sufficient radiation to cause any medical problems, but all were checked over as a precaution. At least two were given potassium iodide by the AF physician who attended them. The other three, Betty Cash, Vikie Landrum and Colby Landrum, were not contacted by AFINTEL because of their involvement with civilian UFO people. It was determined that these three could be used to further the "UFO explanation" and thus provide effective cover for the real nature of the affair.

NASA/USAF's reason for cloaking the matter in secrecy and confusion is to avoid a public outcry against nuclear propulsion research similar to that currently in progress against the nuclear power industry. It was deemed highly desirable that the public not be made aware that the government is doing any work in nuclear propulsion systems at all. Also it was felt that any admission that the government was involved in testing nuclear propelled devices so close to a heavily populated area (Houston) would be viewed by the public and the press as a callous disregard for the public safety.

One curious aspect of this case is that the chief civilian investigator (John Scheussler of MUFON) is an employee of NASA and at the same time serves as an active CIA agent. (This, said Doty, was confirmed to him by "a friend" who had checked the matter out.) Since it is certain that Schuessler is aware of the real nature of this case, it must be assumed that his activities on the part of the "UFO investigation" are part of the concerted effort to confuse the issue in the eyes of the public.

(5) NASA recently changed from the use of "Code Names" for "Projects" to "Numbers" for "Programs".

(5a) Computer which stores SCI (highly classified security) indices and references is known as "IMID", and was developed by IBM. This system has a complex set of access procedures, etc. None of the data on IMID is listed in the DCI index listings or files. (DCI= Defense Central Index; SCI= Security Classification Index).

(6) More details about "Project Aquarius":

The "MJ Twelve" in the classification restriction refers to access by the President, members of the National Security Council, and other individuals designated by this group. The total number of people who have access to the "Aquarius document" is twelve (the "Magic Twelve").

The Aquarius document is about 6" thick, is compartmentalized to include separate sections on structural analyses, metallurgical analyses, autopsy reports on recovered aliens, etc. Names, dates, and places are cipher coded with the code key kept under separate classification. President Eisenhower ordered all copies but one "incinerated" during his administration. The material that would have been designated "Project Blue Book Special Report No. 13" has been incorporated into this document as a special section. (The person who was responsible for the foul-up in the numbering system which led to "Report 14" without a "13" was disciplined for this embarrassing oversight.)

The Aquarius Document contains "philosophy" as well as technical data. In the section which deals with the philosophy behind the need to maintain a "Top Secret" posture for as long as possible with respect to the Aquarius data, are the following two startling conclusions which have been arrived at by the US government with respect to UFOs:

- (A) The events surrounding Jesus Christ and the establishment of the Christian religion were manipulations affected by beings of an advanced civilization from another world. This was done as part of a sociological experiment of some sort with human beings playing the part of the "guinea pigs". At least some of the subsequent visitations of UFOs to planet Earth over the past 2,000 years have been for the purpose of monitoring this experiment.
- (B) Release of this data to the public would not only severely cripple the ability of the government (indeed any government in the Western world) to effectively govern, but would also severely damage the very fibre of Western civilization as we know it.

The figure "a million years in advance of our own" has been used to describe this alien civilization.

Doty received most of the above information concerning Project Aquarius from Scott Doorman, former intelligence assistant to President Carter's former National Security Advisor Zbigniew Brezinski. Doorman is now an executive in a private firm and lives in Virginia near Washington, D.C. Doty has requested that Doorman not be contacted by me.

- (7) The material in W.B. Smith's 1950 Top Secret Canadian memo is 100% accurate concerning American attitudes, efforts and secrecy regarding UFOs.
- (8) Someone in the Library of Congress called attention to our work on the Roswell Incident and brought it to the attention of one of the intelligence agencies (Doty said he did not know which one). As a result, the FBI made a brief inquiry into myself, Berlitz and Friedman. The conclusion was to let things ride for the time being.

(9) Lt. Col. Wendelle C. Stevens (USAF ostensibly retired) is in reality an active agent for AF Intelligence. He is part of the government's "disinformation" program with respect to UFOs and civilian efforts. Doty advised me in strong terms to "Forget about it and Leave him alone!" He says he has known this for some time, but waited to see how much I knew before telling me.

(10) Norman Seymour, Boise, Idaho (currently), formerly AFOSI at Kirtland, was responsible for setting up security standards for the protection of a "recovered spacecraft" about 1968. The analysis of this craft took seven years to complete at Sandia and Los Alamos, with some structural analysis done at White Sands. On April 7, 1970, two AF technicians, 1 sgt., 1 enlisted, were killed at White Sands while trying to open something that was recovered. The object exploded. Parents were told their sons were killed in an explosion at White Sands, but no details were given.

Seymour currently works for Skaggs Drugs.

(11) Dr. Uhleison, mentioned in previous notes, is with NASA Scientific Intelligence. He is also possible CIA, and lives in Roslyn, Fairfax County, VA. It is unlikely that he would appear on a NASA employee roster.

(12) The Airways Air Communications Service (AACS) was involved in UFO investigations to the extent that they monitored areas where high concentrations of UFO sightings had been reported. They had mobile and airborne monitoring equipment on call for this purpose. Some of their people were active during the Wanaque Reservoir flap in New Jersey in the mid '60s.

This agency was later incorporated into the Defense Communications Agency (DCA), which now has custody of the old AACS files.

(13) Senator Harrison Schmidt of New Mexico (former astronaut) might be a helpful contact.

(14) Probably the most comprehensive intelligence brief in existence on UFOs, aside from the Aquarius material, is the Top Secret USAF Intelligence Brief 210.3. This was originally prepared in 1974 as a Joint Chiefs of Staff (JCS) document, is currently in custody of the Air Force, and is updated constantly. Since 1974, thirty-one changes have been incorporated into this document. Doty has had personal access to it while in D.C.

(15) A "Project Milky Way" was a joint USAF/NASA project involving use of satellites to monitor UFO activity. This one was leaked in at least one civilian UFO publication or book, but the AF covered it effectively with false information.

(16) The recent "Ellsworth Humanoids Hoax" recently written up by Larry Bryant in MUFON Journal 164 (Oct. '81), p.16, was not a hoax at all but an actual leak that was well covered by the AFOSI and AFINTEL. Doty says that he was personally involved in parts of this one and that "there were some real unexplained things in that one". This is something we will go into at a later date when we have time for it.

(17) Regarding the NASA involvement; most of the activity is at Patrick AFB in Florida. The Geodetic Survey Office in MD is a cover for the UFO data collection system.

NASA's debriefing for astronauts is composed of four parts, three of which are unclassified and the fourth of which is classified. UFOs are covered as a part of part four.

Doty said that he had heard from a friend of his that some of the astronauts did have encounters in space and that NASA altered film to hide this. Doty also said that NASA employed a "two-sided tape" system in their radio communications link with astronauts in space. This means that what the public hears may not actually be what is being transmitted at the time. (Perhaps some kind of a "sideband" system involving a signal which must be "split" upon reception by sophisticated equipment. WLM-idea only based on conversation at this point. Doty seemed aware of the system but did not seem to quite understand how it worked.)

(18) Bill Teneyk (pron: "ten-ike") HQ AFOSI/IVOS may be of some help in providing additional information. He is rather opposed to so much strict government secrecy on this topic. Important not to mention Doty or indicate how Teneyk's name was obtained. One possible approach is to call Bolling, ask for number of OSI/IVOS, and approach Teneyk with offer to discuss APRO data on Bennewitz with him. Since AFOSI is doing its own investigation of this fellow, he should be interested. After contact is made, as for his help in providing additional UFO-related information. (Reason for continued interest in Bennewitz is that he has threatened to go to the Soviets with his discoveries.)

(19) Intelligence agencies tend to monitor civilian UFO gatherings only when something of interest to them is on the agenda.

(20) On my request for info on Capt. Roland Willett, USN, Doty advised that Willett had been at Corpus Christi Naval Air Station from 1947 through 1950, and that he had retired at Brownsville, Texas, in 1953.

Subsequent meeting at noon, Dec. 30, 1981 in parking lot of Goody's Restaurant, Yale Ave. at Gibson Blvd. Meeting lasted about 20 minutes.

Doty gave me copies of three documents as follows:

- classified document relating to Project Silver Sky, dated 1969.
- classified document relating to UFO photo analyses, with mentions of NASA UFO involvement, Project Aquarius, Bennewitz case, etc.
- unclassified (FOUO) directive originating with HQ AFOSI dealing with handling of FOIA requests from Stanton Friedman.

In response to my question about "Do we know where they (the aliens) come from, Doty answered that he had heard that there were possibly three distance alien civilizations that had visited here in the last several thousand years, and that one of these originated in a star system about 9 or 10 light years away.

He also said he had no direct knowledge of any communications between us and the aliens.

Some data concerning the interpretation of documents and abbreviations follows as annotations to the documents themselves.

END

01-02-82

Doty arrived in car bearing NM license number AYJ 954.

Data derived from investigation conducted 12-17-81 into possible identity of beer truck driver who witnessed UFO in 1965 Zamora/Socorro incident:

Driver may have been one Luis RIVERA, former employee of J.G. Maloof Distributors, 523 Commercial NE, Albuquerque. Rivera was employed by Maloof from about 1965 until about 1970. He is credited with starting the Socorro route.

Rivera is still living in Albuquerque, but whereabouts unknown. One of Maloof's current employees saw him at NM State Fair last year.

Persons in Socorro who might be able to help on this matter are:

- Max Torres, Sunset Bar, Socorro
- Steve Torres, El Camino Motel, Socorro
- Earl _____, owner of Capitol Bar, Socorro
- "Mannie" _____, owner of Buckhorn Bar, San Antonio (NM)

Above information obtained from interview with Dave Kaury, now part owner of J.G. Maloof.

Interview with General Jimmy H. Doolittle, Monterrey, CA, 10-06-81, 3:00PM

Genl. maintains that his only "immediate association with UFOs was as Chmn of AF Scientific Advisory Board." During that time, he says, they "hired a team to make a complete study" of the matter. This team selected sightings and investigated each completely. They found that almost all verified sightings could be explained with today's knowledge. A few, however, were not possible to explain, but there was a possibility that with additional knowledge these could be explained too. Adds that "it was impossible to do a scientific study of them". (Possibly a telling remark?)

(Note that this statement was virtually word for word what he said to Hal Starr (on tape) 5/6 years ago. It was said almost as if it was a prepared text.)

Genl. closes with "this was the last I had to do with UFOs."

Admits making a trip to Oslo, Stockholm, Copenhagen, Amsterdam, etc., but says he does not recall exactly what transpired on that trip. Says he was with Shell at the time, but did check in with some military people. Travelled Oslo to Stockholm on 8-20-46 and Stockholm to Copenhagen on 8-22-46. Cannot recall making any written report on activities in Stockholm. Says he recalls concern of Swedish-British-US authorities about "Ghost rockets", but doesn't recall people involved.

Doolittle was member of AF Scientific Advisory Bd. from Jan '51 through Dec. '58. He was Vice Chairman Jan. '51 through Nov. '55, and Chairman from Nov. '55 through Dec. '58. He was also a member of NACA from 1948 through 1959, and was chairman 1956-58. At that time, the agency had about a 100 million dollar budget.

Getting back to the UFO study made by the AF Sci. Adv. Bd., he says this was made at Colorado Springs, was a study of several months duration, and took place in the summer time. An individual was hired who surrounded himself with experts. The group eventually submitted a report to the Sci. Adv. Bd.

At this point, when I asked if this report might be available and where it could be obtained, I received a lengthy discourse (almost a fatherly lecture--rather stern) on "secrecy and the need for security". He began by stating that "too many of us are blabbermouths", and went

on to say that some things can't be discussed for the good of the nation. Pointed out that there were unfriendly ears everywhere. Sometimes things must be classified and must remain classified for a long time- even more than thirty years. The thirty year thing is "not automatic".

At this point I made a comment about the problem of knowing where to look being often as important as knowing what to look for. Doolittle answered that "sometimes even knowing where to look will not help if the things you are looking for are not meant to be found".

We moved on to the Smith memo, which I recited from memory. He is interested

Q: I wonder; can you comment on this memo at all?

A: I know nothing about it.

Q: Can you comment as to the use of Dr. Bush's name here? It seems unusual that he would be named if there wasn't some sort of involvement.

A: It was the kind of thing he would have been interested in, but whether he was involved or not I do not know. I know absolutely nothing about UFOs, either on or off the record.

Q: Assuming for a moment that this memo can be taken at face value, then it would certainly seem that NACA would have been the most logical group to have been involved in such a project.

A: Not necessarily. There were other places.

Q: Can you elaborate on that?

A: No.

Q: Can you recommend anyone else whom I might contact for further information?

A: As to the Colorado Springs project, you might try to contact Dr. Alfred Rockefeller. He was a historian for the AF and might be able to help you somehow. He is now retired in LA. (PH 213-393-3191)

Moving on to his work under Eisenhower to investigate the nation's intelligence agencies and the security network, he seems surprised that I knew about this at all. When I ask if the final report on this work might be available, his response is: "If any such report exists, I am certain it is still classified Top Secret".

NACA Intelligence? He says he cannot recall a specific intelligence function connected with NACA.

My impressions of interview:

(1) It appears he knows something, but he is an artist at keeping his mouth shut. His answers deal totally in specifics. He does not and will not speculate on anything.

(2) If he is in on the UFO secret, and if he had anything to do with covering it up, then it is well covered.

MOORE/PRATT July 7-9, 1982

(implement a policy of)

M How many people wd it take working full time to sow confusion, keep the UFO groups off balance...it wdnt take too many people to keep us off track...one in each of the ~~from~~ ^{three} major orgs and one for ~~xxxxxx~~ the smaller ones thTat were deemed to be worth the trouble. and you might have a few other people whose jobs are associated therewith, and really th could quite effectively keep everybody off balance by feeding disinforma- tion or feeding a little bit of truth to get somebody off on another track pursuing something that isnt deemed to be too important. It wdnt be a major operation, and that companied with the concept of having the people who have to deal with the press simply maintaining an attitude of debunking and of the concept that there isnt really anything there anyway and that the Govt isnt interested in doing anything, they have found nothing in all of its investigations--the standard press statements --and those people wdnt have to know there was anything to hide. They cd simply be told well there's nothing to hide, we're telling the people the truth, it's all of these UFO nuts running around trying to make liars out of us when in fact there is nothing there. Anf the press tends to take them govt pronouncements ALL TOO FREQUENTLY AS GOSPEL without questioning ** and at the same time requiring extraordinary evidence from anybody privately who makes a statement to the contrary. It just wdnt take that much and the money that wd be spent to keep it going in the space of a ye time wd be more than for those few people in just paying their salaries than all the UFO groups could fund for research in ten years instead of one, just completely overwhelm them. ...I think thats what we're exper- iencing here, that's why we've never been able to get off the ground. When NICAP really began to get threatening to the Air Force, beginning to have an undue influence in the govt sector, that they were simply deraile at that point. And now all of a sudden we find out that their board was riddled with CIA people and the guy who replaces Keyhoe as director has

M-P 2

questionable connections and the fellow who takes over for him even more questionable connections. who knows how many people in the other orgs arent in the same boat?

P Are the civilian orgs important enough to disrupt? Do they pose enough of a threat to uncover any of the secrets or cover up or whatever...

M Yeah, I guess in a sense they present not a threat but a possible threat. The idea is not to allow them to get to the status of threat but to keep them off their balance before they ever get that far. And I think thats a good strategy.

P There are enough bona fide nuts in the field to--

M Of course--you encourage an Adamski here, a Richard Andolucci there, you encourage a Wendelle Stevens here, you encourage any number of those people...they don't take much encouragement. all they need is a little attention, so you show them how to get it and they do the job for you without you ever having to pay them. The same sense with Phil Klass. They don't have to put him on the payroll. They just need to encourage him to continue what he's doing. So, any time he flags in his effort they dump a little more seemingly bona fide debunking information on him that it couldn't be so because...and he takes it from there. Why pay him?

P General G and Mr D . . . *pol* line

M Yeah, could be a clue . . . somebody who had been in Vietnam, had been disgusted with the situation over there, comes back into the intelligence service, spends a number of years doing whatever kind of work. All of a sudden he stumbles onto somebody like "Dr Berkowitz" and that necessitates him getting involved at a higher level and then finds out what's behind UFOs, so to speak, and because of his disgust with the whole system realizes that this might be the way to get back. So he utilizes what he has come to know to gain more information and at the

*Sen
Joe
Grimm*

same time makes an effort to pass it along very quietly-we could have a whole group of people in a similar situation where they are part of a loosely knit effort to change the status quo.

P what I was thinking of earlier is, say, starting out with the South Dakota incident, with a cop on a rural road late at night and this thing goes thru the sky etc...and next thing the LCF...and alert at Lima 9, an OZ violation...SAT..zapping of rifle, etc...then in comes the hero

M There weren't two characters (SD incident) only one

P and the hero is one of those who comes to investigate--maybe two heroes for all we know--and not believing the soldiers' story about seeing the object and all ... but continuing the investigation and finding that the silo had been tampered with in some fashion and then going on with the investigation and then being called off by higher authorities and being told: "What you're dealing with is not human." And this perplexes the man...and then I don't know exactly what happens next but then he would be one of those flying down to Kirtland AFB and being suddenly accompanied by a UFO sitting off his wingtip and attempting to report this and their telling him to switch to another frequency to discuss this and then being grilled over the radio and--

M You can have the Angel Fire thing ... the pilot would make the report. He (hero) wouldn't

P OK, he could be with a pilot, I suppose.

M Yeah, because if his first experience is this thing up at the silo and then suddenly he--and there's a hint that there's something at a higher level than he has previously suspected, and then all of a sudden he gets involved a pilot sighting and the pilot automatically knows how to report this, and suddenly there's a hint that somebody at a higher level is dealing with it too. And not only that, but they've got full

time people sitting out there waiting to give instructions on these reports. That certainly would be enough to get him curious.

P And then may or may not have the thing sitting on the end of the runway. Maybe that wd just clutter it up. But when they do get -there theyre both debriefed and told not to say anything.

M Yeah, it's almost too contrived to have it sitting there waiting for them.

P Yeah, although this allegedly occurred to that colonel...OK, and from there--this is what you call a plot point, number one, and then he realizes "My God, they really do exist!" And then he gets i-nterested in finding out whats behind the UFO phenomenon, and this could be wher eh he as an OSI officer or investigator or whatever, is then briefed on the phenomenon in Washington or wherever he, at Bolling AFB or wherever he is told about these things. He does not know exactly what Aquarius is about but he hears about it at the--I dont know what you call it, there in 1980 in December when he went thru all that--

M It could be a briefing.

P OK, but then you would have to have a reason for his being disillusioned or unhappy with certain aspcts of the government's attitude, etc. We have to bring in somehow the Vietnam angle. Did you get the impression that D lost some good friends over there?

M Yeah--

P Deliberately led to their slaughter?

M Well, he was at a site, which apparently was a listening post that was overrun in either Laos or Cambodia, and he told me the name of the site at one time...but apparently that was one of the things that kind of disillusioned him. I guess some of the people that were there were killed. It could be that they couldnt leave the place until they had

destroyed some of their equipment so that it didn't fall into the hands of the--it could be that. I don't know. But it was over run. Whether they hadn't provided adequate support or backup or defense for that site or whether they had allowed it to fall for another reason, I don't know.

P Well, I had a retired scientist in my original sketches, only my retired scientist was patterned after Howard Burgess----- (look at papers)

M "High command briefings requested in accordance with AFOSI Regulation 124.4 be completed at HQ on..." see. He's requesting that in August of 80....which wd have been just before he contacted me. Maybe three weeks.

P Now you told me CR44 was Collection Requirements for when it is known to be a UFO and 51 when it could be a UFO or a foreign craft--

M Yeah...Now the possibility is too that we center the book, not around him but he could be one of the main characters, but around somebody based upon me...somebody in the private field who is interested who suddenly falls into more than he's able to handle. You could work in Berkowitz and uh, make up a name, Mr. Denny, or whatever, ~~and~~ as also principal characters and simply tell it from my point of view, that this man gets into touch, that Berkowitz becomes--his work is known to me and becomes interesting and I get into touch with him and play it sort of straight...a civilian who gets in over his head on this thing and ultimately come up with a plot whereby something--I don't know what the ending's going to be there....you'd have to come up with an idea for an end--where does it all go? That I find out enough of the truth to realize why the government is in the position it is and can't tell

about it, or where I join the other side.

P Yeah. My reason for picking the hero as the main, h the officer, the intelligence officer as the hero is that it would be far easier, I wd think, for somebody on the inside to get at the truth of this matter than somebody on the outside, like you or me....OK, that's a possibility too. One problem with this whole thing is that it could lapse into pure words where somebody is telling all this, or telling hos they discredit this person, that person, how they deal with e people--uh, when it is better to show by example. Especially in a movie, or in thenovel, or whatever--having somebody expalaining all this is happening--

M Yeah, you have to work them in from two sides of the coin. You have to work, say, Stringfield and whoever into the two sides of the plot there and show how one is reacting and the other is--

P OK, we have this guy, he's brought in, after Kirtland, and he's briefed and his first assignment is to work with Berkowitz and check him out and then somewhere he could be given the job of discrediting Stringfield, and what he does is to feed him the photos and let him hang himself with the bad photos or whatever. How do you bring in Wendelle Stevens? A side plot or--yeah. He could be one of the freaks throughout the movie or the book and you discover toward the end that he is really one of the insiders and that's his job. Somewhere in here you've got to have this tabloid UFO reporter who is made to lose his job and effectively put out of the UFO Business. All right?

M Yeah, sure....

P I was also wondering about the possibility of bringing in as a source the widow of an admiral who was once head of CIA or something like that.

M H0w about not necessarily the widow but the will...Y0u have reason to believe that a given admiral has secreted away c-rtain items of evidence

during his lifetime, perhaps into a safe deposit box, and he dies of old age--nothing mysterious there--and you as an investigator, having heard rumors that this man might have left behind something of great importance are interested in finding out who has the estate. He dies without issue and without near relatives, and so you make an effort to locate the certificate of death, but there is none. YOU make an effort to locate the record of a will for probate, and there is none. Neither is there a statement that he died intestate. You make an effort to locate the grave in a cemetery, but there is none. And somehow you find out who his attorney was. When you approach the attorney you discover in some way or another that the attorney has been sitting on the will all because if the will ever goes thru probate it is going to really create a fuss because it mentions these items and leaves them to posterity, to the public, or to the Washington Post or something like that. And so the lawyer has been behind all these ^{little} efforts to create a non-person, to make it appear there never was one, or in order to avoid filing the will, of course, he got to avoid filing a death certificate, so there's no crosscheck there and feeling--because there's no close family, no one to have left it to anyway, there won't be any questions there, and maybe the second cousin who might have gotten interested there at one point is dissuaded from doing so or is persuaded there's nothing in the will, you know, that he's gone thru a lot of effort here to create a non-person on paper to avoid filing his will, which he has been charged with filing. And then have him prepared to turn over everything for examination to this reporter, to have him disappear that night under mysterious circumstances as well.....have the attorney disappear. He makes an arrangement with you to view the contents of this safe deposit box, which includes numerou

documents--

P Why would you--why is the attorney covering all this up to begin with?

M He is a patriot, a red neck. The admiral was a good friend of his. He doesn't want to see the man's name associated with such things.

P The lawyer knows what's in the things?

M Yeah...Why didn't he simply destroy it? You'll have to cook up something there, but, see, to bring that it--that parallels very closely the business with Von Poppen, Nicholas Von Poppen...the Baltic baron who is supposed to have, according to Story, had the photograph the thing and have the metallurgic analysis by a process of photography, remember that? And I made an effort to locate him and he's almost a non-person. There was no will ever filed, although I did get his death certificate.

P Let's suppose we have a private investigator, a private researcher, who is aware of the lawyer and the admiral and has not been able to crack the lawyer, and you're being interviewed on the radio one morning and our hero hears you while driving to work and he gets in touch with you the researcher, and wants to learn more about what he's gotten into. And somewhere after he gains your confidence you tell him about the lawyer and the admiral and the hero is able to persuade the lawyer to part with this information in some fashion, being with the military and being a high ranking officer...All right. What I would like to see is somewhere toward the end of the book a confrontation of sorts between the hero and the president of the United States, with the president of the United States explaining to him exactly why the hell he cannot continue any farther into what he is doing and these are the reasons why we have kept this quiet all through the years....You mentioned a slow plot in one of the books you mentioned--what do you

mean by a slow plot?

M It takes too long to develop any action. It just drags along.

P OK. Many things can be mentioned in passing--

M Oh, sure. you can s develop side plots as long as--the book can be a thousand pages thick and still move very quickly. On the other hand, a book can be 200 pages thick and drag...

P Certain well know cases which none of the civilian orgs --there are certain things about certain well known cases which none of the civilian orgs know anything about. You mentioned communication efforts.. I have been told that in the Iran case there was a communication effort there but I was never able to check this out....it wd have been a real revelation if it was true.

M Even more frightening at the end wd be to discover that the aliens are controlling the dissemination of any information about them.

P Welll...we have already decided the aliens really don't give a good god ~~dam~~ ^{damn} about us at all, and couldn't care less what we know what is revealed about them, IT is our own government that is afraid to let this information out, that we are merely an experiment--

M Yeah, that's true and if we go beyond that we are really going beyond the realm of what we are trying to do, which is try to get as much of the story out with as little fiction as possible.

P The hero says "Why cant we tell the people? They're intelligent and sophisticated enough to accept the fact that there may be civilizations out there, but that's not the whole story. The whole story is that we are an exceedingly inferior civilation, that we are the product of a continuing experiment...and things like that.I would like to bring in one or two rather good UFO cases that the hero is involved in in some fashion

M In or with?

P Either way, just so long as there are five or six good incidents throughout the book.

M Well, this uh radar jamming certainly would be one (Kirtland AFB)

P That's where Dr. Berkowitz could come in too.

M He should definitely be involved (change tapes to side 2; #1)...IT could be that one after his briefing that leads him to believe he really hasn't been told all of it yet. You see, at the point where he thinks he knows it all, he suddenly realizes there's a lot more to this than he's been told. When he tries to find out, he meets with some stone walls.

NK Portray him as a mad scientist, only not so mad--

M Oh, yeah, Berkowitz, but I mean, with our hero. With Mr B or Mr C or whatever we call him. You know, have him go and have his briefing and come back very confident that he now knows all there is to know. And suddenly come home to an abduction case, one whale of a goodie, and realize that he doesn't know it all, that there is more to it than he's been told and when he tries to find out more about it, he meets with a stone wall, that he can't get to that point and is perhaps finally informed that "You've been told enough to do your job--you don't need to know any more to accomplish your tasks and therefore lay off of this part of it." And we could work into it the abduction case, a good abduction case, where somebody has actually disappeared for several days and re-appeared, and he is aware that there has been another officer or someone else working on this case and he tries to find out what's going on and is told they're not working on this case. But he knows they are, and that they're reporting to a different place than he is. You know, there has to be that aspect of a delineation of his

knowledge and his tasks in connection with it. and his confidence that he is on the top of the heap and knows everything, and suddenly realizes that there is a whole other aspect to this story that he doesn't know anything about, and can't find out about, and is told very distinctly that he doesn't need to know because it doesn't have anything to do with his tasks. Point up that compartmentalization aspect of this whole thing.

P ...we've talked about abductions and the fact that most of the abductions we know about are of very ordinary people, etc--WHY would this be?

M We've always assumed that the reason for the abduction has been for the alien to study us, but there could be another motive and that motive is that the alien wants to use these people and is programming them accordingly, that it is easier to control people who are average and who are really just normal joes/^{so to speak} and who are not really inclined to do a whole lot of analytical thinking, ^{simply do things} ~~does not want to do anything~~ on impulse and it's easy to ~~hide by the xxxxxxxx~~ provide those impulses to those people who won't think about why they're doing what they're doing but just do it. IT could be something like that. It could be part of the experiment. Let's program 5,000 of these people to do something or to think a certain way or to interact with their peers in a certain way, and see how this affects society as a whole if you have 5,000 people, what wd be a good thing to fit into their--you could program them to do post-hypnotic suggestion ...on april the first 1984 you will want to do something, whatever it is. And then sit up there and watch and see what effect that has on the society as a whole. Is it a significant enough force to change it? What effect is there? And that would be logical from a point of experimentation. What can we have them programmed to do?...Try to organize a peace march or something. Try to organize an anti-nuclear demonstration. Try to call the President

and make your views known. Any number of things there they might give a post-hypnotic suggestion to these people to do, which is strictly designed to determine the influence of that many people doing the same thing at the same time on the society.

P Going back to Aquarius and big events in history, Jesus and Mohammed and Hitler--now Hitler, didn't he hear voices? That would be a very good way to explain Hitler. Maybe he did hear voices because he was being programmed to do what he did.

M Joan of Arc heard voices...the children at Fatima heard voices in their heads . . . You go back and follow through voices. Certainly many of the religious characters in the New Testament had dreams wherein they were told what to do, and did--Paul on the road to Damascus heard a voice and was blinded by a light. Mohammed certainly heard voices, the angel Gabriel appearing to him. We could tie all that together. One wonders, you know. I hadn't thought about that before, but one wonders how many of these religious and political figures who have affected the course of the world. I guess you'd have to go through and come up with a tentative list of candidates of these people who had the greatest influence on history and have they heard voices. Lincoln believed in spiritualism and heard voices. Had a couple of seances at the White House, as I recall.

P T ruman thought there wer e ghosts in the White House

M You'd have to figure out candidates for people who have been influential in changing the course of history. Then see if they had perhaps heard voices.

P Somewhere in here someone made the decision that UFOs pose no threat to national security, and it is possible that they know that they pose no threat to national security because they have been told that we

don't really give a crap about your little country and your little earrth and we're not going to destroy you because you haven't got anythin that we want. Whoever it was, Truman, Eisenhower who supposedly-- someone must have had an encounter with aliens in which they were given the message that this is the situation, you know, and--somewhere, where did they get the idea that Jesus and Mohammed were experiments? The only way they can know that is because the aliens told them--

M OR. Or they managed to decipher material, written material found in the crash. Suppose there were some volumes found on board and they're dealing with that and they were ultimately deciphered.

P But then where do they get the idea that they pose no threat to earth?

M We could quote some of those texts. Work in a cryptographer or something who had to deal with that material. And we could legitimately point up that there really wasn't much written material on the craft because they've all gone to video screen and thought all that was found was some printout or what appeared to be printout rather than books as we know them, bound volumes, records. (Printout?) Computer printout. Being the aliens are ahead of us technologically they rely on electronic data storage and recovery

P But you wouldnt print it out and read it if it was in front of you on the screen.or maybe there is a video screen that does contain infor,a- tion that we can decipher what these charachters mean and are able to pick out some of the words and meanings thereby getting--of course, WE call him Jesus and call him Mohammed and so on but how would the aliens refer to these creatures

M Religious or philosophical stimulus number one, political stimulus one, political stimulus two, etc.

P I dont think we want to be that stiff about it but there could be clues

deduce this is Jesus they are talking about in there that we could say, This is Jesus, that is Mohammed they are talking about, this was Hitler and so forth.

M It could be in the form of an outline, an abstract for an experiment. That's all that survived the crash. It happened to be on the screen at the time, it was locked in and it ends at a very cryptic point, but enough to give us a lead as to what they're up to.

P ...we have so many 'visitations,' tens of thousands and hundreds of different sizes and shapes of craft involved. Is this all one civilization we're dealing with or several?

M Three.

P All with the same purpose or what?

M Well, according to D, what he said was the JCS report, the abstract, the overview, that it had been felt there were three and that two were readily cooperating with one another but that the third was sort of aloof and doing its things on its own, and Bennewitz feels that there's more than one group but he feels that they are actively campaigning against each other, or that one group is more beneficent than the other two and that it is actively trying to control the activities of the other two, which are really more hostile in their intentions. That is his feeling.

P Hostile and callous.

M Yeah. But the flavor that I got from it was that none of the three particularly cared much about us but that they had different motivations for what they were doing, and two of them were working closely together and the third one was doing its thing--and it could be the third group--here's a thought--I've said this before, probably to you--people say, "well, why don't they talk to us?" and I pointed out that well maybe ~~in their opinions we are/inhabitants of a planet and they're not inter-~~ just

ested in us; they're interested in something else here, and we just
 happen to be in the way, and the one analogy that I draw is that the
 one unique thing about Planet Earth in the solar system is that it is
 the most dense body in the system, meaning it has the highest concen-
 tration of the heavier metals, and it could be that an advanced civilia-
 zation has run out of run short of a certain element that is essential
 to its production of energy and this happens to be the nearest good
 source of it. So they are coming here and mining underneath our oceans
 grabbing what they need of that particular element, and maybe refining
 it through the first stage under the ocean and taking it home and we
 just happen to live here and they're not interested in us as people,
 although every once in a while one of us gets in their way and there's
 an encounter of some kind or something of that effect that whatever this
 element is, and we could go to a geologist and find out some more facts
 here. It isn't really all that abundant here either and they can only min-
 e a certain source of it so long and then they have to search for
 another source, and so they are actively surveying the planet to try to
 find those sources and the spots for them and then that's why we have a
 flap in one area for a while and then they move somewhere else, and
 there is no identifiable pattern. It is strictly at random. And the
 government knows this too but how do you explain to the citizens that
 your planet is being systematically pirated and there isn't a damned
 thing you can do about it? So, that could be one group, and the other
 two groups could be, of course, ~~xxx~~ social scientists or psychologists
 who are experimenting with the creatures here and are not interested in
 the resources. That would explain a lot of these underwater emerging
 from the rivers and the lakes and the oceans . . .

P (not national threat but individual threat; too many people hurt, burned,
 etc.;

M ...South Dakota case I investigated several years ago, a craft came down quite close and a dog died several days later of a massive stroke in the brain...it was in the APRO Bulletin... for purposes of dramatics, I think that's what we need to do--have him (hero) run across a good composite encounter case, or maybe a real one if we can find one in the right time frame . . . there's a fascinating case we ran across in canada, a woman called in during a call-in show and wanted to know where she could report something, didn't want to give her name or anything on, the air, didn't want to give it off the air; she wanted to know where she could call me, so I finally gave out where I was staying and the next morning she called. It turned out there were three of them involved and they had had a close encounter sighting in Toronto about the time they were putting the top on the CN tower, so we were able to pinpoint it in time. And Stan and I and Nick ... went out there and talked to these three women. Very clearly they all told the same story. We talked to them all separately. In fact when we got there only one was there and then they came in, one came in and later the other came in, and we were able, because of that, to get each one's story without interference from the others without really knowing what the other ones said. They told exactly the same story. The curious thing there--I've never run across anything like this one--(needs hypnosis) is that one gal was pregnant and within two weeks of delivery at the time of the incident. They lost some time. Thing came right over the top of their car, shone a light down on them. One of them made an effort to get out of the car and look up at it and had been pulled back by the other ones who said "No, don't get out," but they lost time. We never were able to determine quite how much but it could have been anywhere from 90 minutes to 2½ hours. While--after we had finished talking to each one of them individ-

abduction

ually, and we were having a general discussion amongst ourselves, and I was sitting off on the edge of the room...and the women were over in here, and there was another room over here . . . and this boy came in who was like 6 or 7 years old. He was the one who was two weeks away from birth at the time, and he was sitting thereon the floor playing, not saying anything, just kind of listening, and at a high point in the conversation, as S tan was going on, I said to this kid--nobody else was paying any attention to me, I said, "Do you know what they're talking about?" "Oh, yes." And I said, "Well, do you know what a flying saucer is or a UFO is?" "Yes, I know what they are--I've seen them." And I said, "Well, what are they?" And he said, "They're not very friendly." I said, "Why aren't they very friendly?" He says, "Because they don't talk to me." And I said, "Well, what do they look like?" He said, "Oh, they're little, like me. But they don't talk to me. They just want to look at me." I said, "Have you been inside one of those things?" And he said, "Yes, it's cold and it's very ~~bright~~ white." I'm sitting there thinking, are we dealing with a kid here who has been abducted later on? Are we dealing here with someone who is simply repeating what he had heard from his mother, or are we dealing with someone who has a memory of what went on two weeks before he was born? And about that point the conversation shifted back in my direction and I just never said a word about that, until much later. But not right there. I didn't say a word, and I never did tell his mother or either of the two ladies, one was his grandma and the other was his aunt, I never did tell them that he had ever said anything, because I didn't want to spoil the case. But I was just totally baffled by that one. IT is something that needs followed up on and I never have had the wherewithall to go back there and do it. But that's the kind of case you might deal with, too. An unusual aspect

like that to it . . .

P What would the abduction experience do for our hero--just show him he doesn't know all he thinks he knows about UFOs--

M He shouldn't investigate it. He should become aware of it, and expect to be the one to investigate it, only to be overridden and someone else given the assignment whom he didn't even know had anything to do with UFOs, and this someone else not only won't discuss it with him but it is clear this someone else is sending information somewhere else.

P OK. From plot point one to plot point two there must be obstacles all the way that he has to overcome, or that keep him from reaching the solution. So this just heightens his curiosity and makes him more determined than ever.

M We want to avoid the sinister, though. We want to avoid it being-- the message being imparted to the reader that there is a plot here against our hero, but rather that it is strictly the way things are done. . . . (Ogden Enigma book--the guy gets ahold of an artifact that when you twist it a certain way it drains the power out of a whole area...)

P I'd like to steer clear of anything like that, gimmicks, etc . . .
(going over typed notes--want to use each of these in some way in book)
Majik 12--we've got to get them in there somewhere. maybe they're the culprits who direct the whole thing.

M Yeah, maybe

P Gold Chariot is the UFO operation itself, of NASA?

M It's NASA's data collection operation

P You are very very definite in NASA's being involved in all this?

M Yeah, as far as I can tell it is good information. P Colonel Purvine had had sightings himself--was he involved in that incident (Pecos)?

M Yeah , at the debriefing that followed...

P The business of Carter's being briefed on June 3, 1977, comes from B's

aide?

M Yeah. Through D, but he says that's where he got it.

P Camp Perry, Virginia, is where the CIA trains its people and a lot for foreigners. IT's a highly restricted area, so that's a good place to hide something. Very secure....OCA, you don't know yet what it means?

M No.....

P It says, "Also see item 200.23, two pages attached." Those were not attached either...(what is that)

M Apparently it has to do with CR 51. 44 and 51 are mentioned. It's an Air Force regulation entitled, "The regulation--the NICAP regulation (see notes)...and it's classified secret ...and Greenwood got onto it and claimed it had to do with the old NICAP group and Air Force infiltration of it, getting civilian information thru NICAP and all that. but it turns out that it's (see notes)....it has to do with the reporting of possible foreign aircraft by pilots, or possible hostile intent by pilots, and it mentions in regulations, CRs 44 and 51, and so on, ... anyway, it turns out the only thing it had to do with UFOs was one section of it, it had to do with reporting them.....

P Silver Sword, that was simply a test...

M yeah. I've never been able to find out anything more about that....

P

P Computer . . . IBM, etc (see notes)...

M What I was asking him about was I wanted to know why it was that when you make a FOIA request, especially on something you knew existed and so frequently get answer back stating they didn't or couldn't find anything, and he said, "Well, of course, the standard procedure is to check only DCI and he said of course this is the least likely place to find anything if it is sensitive. Then they can answer that they have checked the DCI and nothing appears on their screen and unless you happen to know that there are other sources they might check you would have to take that as an answer. And he said, it's not lying, it's true. It's a way of getting around the many problems with the public to check their index with the DCI and if it's not on there, then therefore we don't have anything, and he said it is essential that the flunkies who get your request are not aware that there is another system.

He said there is a whole intelligence gathering division in NASA that is not generally known at all, and this guy (Dr. Uhleison) is the nominal head of it (see notes) . . .

P "Top Secret USAF Intelligence Brief 210.3..."

M That's the JCS document that D has said he had seen.

P He has read it through?

M Yes.

P OK, that is what he saw at the end of 1980...It is updated constantly. What is contained in it?

M I gather there is a little of everything in it. It's extracts from the Aquarius document. A briefing, as opposed to a comprehensive report.

P How did all this come into being?

M I don't know any more than what I've told you. Eisenhower was given the report...

P Which report we talking about?

M Apparently they had had some kind of a study going, which must have begun under Turman, and I have to conjecture that it began with Roswell, and that (Vannevar) Bush was involved. and perhaps Doolittle was involved. He and Eisenhower were thick as thieves. Eisenhower trusted Doolittle implicitly, with even the highest level stuff, and that's historically recorded. In fact, when Eisenhower wanted an evaluation of the ability of the U.S. intelligence community to keep secrets, Doolittle did it and submitted the report directly to Eisenhower and no one else. And that's something that didn't come out until the Eisenhower Diaries were published, which was last year. And I asked Doolittle about that, and his comment was that "If such a report exists, it's still Top Secret."

P Twining probably went out to New Mexico. Vannevar Bush disappeared for what, ten weeks?

M Yeah

P And nothing in the record indicates where he went.

M Nothing that I've been able to find. We've gone through just about everything we can. But I've got to conjecture that it began with Roswell

P That was another thing I was wondering about, whether we couldn't use Roswell as one of the incidents in the book, and '47 would have been Truman--

M Yeah, but if that study was completed and given to--apparently it was still in progress in '50 because of the Smith memo mentioning

Vannevar Bush as being the head of it at that time. That was November of '50, so it was almost '51, but from what I was told, Eisenhower got the results, the final report, which was the results and conclusions and so on, and he read it and he ordered all copies destroyed but one. And that report was the original Aquarius Document, which I guess has been added to since and so on...The National Security Council apparently is involved in this whole thing, and it's my assumption based on bits and pieces here and there that they were the ones that were overseeing the project, and they are the ones responsible for the national policy, whatever it is, for administering it, that they are directly associated with it.

P Where does the Robertson Panel fit into all this?

M I've done a lot of thinking about that. I'm not sure. There is a clear indication that the CIA in 1952 was convinced something should be done, that there should be a national policy, and you could view their role in a lot of different ways, depending upon what assumptions you made as to what they knew. If Roswell occurred as described then one has to assume that they knew quite a bit from the beginning because Vandenberg was one of the first heads of what was called the Central Intelligence Group, later called the CIA, and maintained connections with them, so you have to assume they had some. But there are clear indications in the Freedom of Information documents from the CIA that they were attempting to influence the National Security Council to promulgate a policy and that they felt that this had to be accomplished because of the potential danger that UFOs could present to national defense if there was a, if they got in the way of actual communications and whatnot, which is essentially what the Robertson Panel came up with. I can't believe that the panel

came up with that on their own. I've got to believe that they were led to that conclusion, that the whole concept of exploring what we knew about UFOs and then concluding that the UFOs weren't the threat but the reports were....

P What about Julius Stratton, president of MIT?

M I don't know anything about him.

P Stratton--I wonder if he is any relation to Congressman Stratton. Anyway, Stratton volunteered MIT's services to assess the whole UFO situation back in 1952, and before that, some of the documents we have indicate MIT did some studies on something or other just prior to that.

M Yes. Stan has been spending time going into those MIT people, and he'd be the guy to ask about Stratton. I don't know. There is a very curious document...that says a number of things. It talks about the Stork Project and it's the one that indicates that the AACS was involved in investigating (UFOs) and at the end of it says that the two books that have come out this year, Keyhoe's books, and Adamski's, take--make liberal use of the Air Force's involvement in UFOs but it pointed out Adamski's book as being a prime example of being obviously fraudulent but being a prime example of the problems of the present policy. Well, that was '53...fully 11 months after the Robertson Panel, and there were all sorts of doings and goings on between the CIA and the NSC where the CIA was attempting to --it's not clear which way it was going, whether the NSC was attempting to get the CIA to take over things or whether it was vice versa. I've never been quite clear on who was trying to influence whom, but if you read that message it is very confusing. And especially

when a lot of those documents make reference to attachments which aren't there. So I have just sort of conjectured that the NSC got control of it at the point in time where Truman was ending his administration and Eisenhower was beginning his. If you stop and think about the point in time of the Robertson Panel, it happened just on that transition phase. See, Truman had not run for re-election in '52, in November. Eisenhower wins and takes office in January, January 20, and you've got the Robertson Panel deliberating in there, and it could well be that somebody was trying to determine how to go on with the change in administrations, which would have presented a problem for that sort of a thing, especially if it had gotten highly developed and the decision had already been made that this has got to be kept locked tighter than a drum. How then to deal with it with an incoming president whose reaction is not certain. And that's a point that nobody's ever brought up that I've heard in discussion. Nobody's ever noticed that that date is a very interest ing--

P The CIA has taken advantage of other changes of administration to take control of things.

M Of course--and so it is entirely possible that there is more to this business than meets the eye and that the Robertson Panel was sort of a front to hide activities behind... Stan said that recently R ickover said--I don't know how he got this--to somebody at a dinner or something, "Yeah, we've got two saucers and a couple of bodies and they're little brown creatures."... (Two saucers?_ That's what I've been getting consistently, that we've

two of them, that one's badly broken up and damaged and the other is almost intact. Very consistent from a whole bunch of sources. Including, of all people--according to Henry Monteith--this Ron Blackburn at Sandia, told him that. And we've had them both a long time...Rich Caudell works with a gal who was at Holloman at the time, in charge of records and things, and he says that she says they were chasing a UFO and their systems went out and they plowed into the mountains (these were the two jets that vanished in New Mexico) and that subsequently that file was pulled. It's not in the files where it should be...she said that even though she wasn't the one to handle that record or have anything to do with it, she made an effort after the fact to see if it was in the file, and it was not. And he offered to put me in touch with her to get her story. He also said . . . he has the name of one of the pilots of the helicopters which went in there and pulled the bodies off the top of the mountain...

Vandenberg AFB, CA

1. (S) This information is provided per your request. The sighting was not reported by any civilians to the best of our knowledge. Our radar contact occurred at 0433hrs., 15 Nov 82, the object landed at 0437hrs., 15 Nov 82. Both Sergeants did not observe the object in the sky until a few seconds before it landed. The photographs mentioned in the message were taken by the TSGT. The photographs were developed by Det 1, 1369 AVDS, Kirtland AFB. OPREP-3 accomplished by KCC. Both Sergeants were de-briefed by OSI. OSI assumed custody of photographs.

2. (S) An attempt was made to determine whether the occupants of the aircraft would communicate. Due to the short period of time the aircraft was on the ground, it was impossible to dispatch the CR team to the site. At no time did the Sergeants feel threatened by the aircraft or its occupants.

3. (S) Both Sergeants were medically examined at the USAF Hospital, Kirtland, on 18 and 19 Nov 82. There was no evidence of injuries, radiation exposure or psychological problems associated with the encounter. The hospital personnel were not aware of the exact nature of the incident. OSI arranged the physical examination and briefed hospital personnel on a "need-to-know" basis.

4. (S) OSI was the only USAF investigating agency at the site to the best of our knowledge. They declined to provide us with a copy of their report. They cautioned us not to discuss the incident with any other agency. All members of this detachment were debriefed by OSI.

5. (S) JCSP 134 complied with per your instructions.

'The hairless creatures, 130 cm in height and weighing 40 kg, had large eyes and heads, 2 arms, eight fingers and bumps for a nose and ears.'

WILLIAM MOORE

WRITER CLAIMS PROOF 'Coverup of alien landing'

By SHARON STEEVES
Staff Writer

Flying saucers and chalky grey, hairless aliens exist and the U.S. government is covering it up, says author William L. Moore.

Moore, of Yavapai County, Arizona, told about 100 people at a Mutual UFO Network seminar at the Westbury Hotel yesterday, the U.S. government knows a 30-foot circular craft crashed near Roswell, N.M., in 1947, but is hiding the evidence.

"I have rather compelling evidence there is a cover-up of national policy on UFOs. It's something that has been rumored for a long time but I suspect this is the first time anyone has had any concrete evidence."

Moore, author of *The Roswell Incident*, said a lot of his findings relate to a violent aerial explosion and the discovery of debris in Roswell in July, 1947.

Witnesses testified the craft "looked like an old-fashioned crumpled dish pan and debris was scattered all around the area."

Six to eight hairless creatures, 130 cm (4 feet 3 inches) in height and weighing 40 kg (88 lbs.), with large eyes and heads were thrown from the craft.

Witnesses said they had two arms with four fingers at the end of each and bumps for a nose and ears.

"A source of high intelligence which conducted an internal study said it had a single heart and lung and a single kidney and bladder. The digestive tract looked like it ate soft or mushy food."

And these creatures could have been writers: Scattered around the wreckage were sheets of paper with pink and purple scribbling on them.

Since discovery of the debris, the government has investigated the situation, but refuses to release any details.

Moore said he has interviewed 85 people who witnessed the incident — 28 were eye-witnesses.

But the whereabouts of the debris is unknown.

"In my opinion it might be in New Mexico. After the crash, it was flown to Dayton, Ohio."

Moore recently got two anonymous letters saying a doctor performed an autopsy on an alien type body in 1947.

"I found the doctor and after reading the allegations to him he asked me if I was aware he was still getting a monthly cheque from the U.S. department of justice."

In December, 1980, U.S. District Court Judge Gerhard Gessell said 131 top secret UFO reports held by the National Security Agency should remain classified. Gessell did not review the documents. His decision was based on a 21-page, top-secret affidavit given to him in his chambers.

So why the big cover-up?

The discovery of aliens could jeopardize national security or set off a national panic, Moore said.

"We don't know anything about these aliens, their powers, motivation or if they are dangerous, which is enough to start a national panic."

26 Sept. 1982

Dear Walt:

I keep waiting to hear a response from my letter about the Zeta Reticuli Incident (box for you at a good price).. considering our mail service, maybe you never got it.

Anyway, I do have several reasons for writing;

1. Enclosed is my check for \$11.50 for the 82 Proceedings
2. Enclosed is a letter sent to Moseley-- not published...
3. I am pushing through FOI for AEC UFO data and for stuff connected with the 1953 Project Solarium and have also been given clearance to review the files of Curt Lemay.. I anticipate being in DC in mid November with Bill Moore and Len. My question is whether or not you have some kind of modest list of others also pursuing historical data re the coverup? Presumably some people would write you for help. Also I am intrigued by the notion that there are government agents monitoring the civilian UFO scene, putting out disinformation, thoroughly muddying the waters... any thoughts?
4. Latest schedule is enclosed... by happy to give a cheapie to the NMA Motorola chapter during my Kansas excursion or to provide a tour focus later on....I know they have budget problems.....

Looking forward to hearing from you,

Most cordially,

Stan

HOLD FOR ANSWER

ON Z.R.I.

March 23, 1982

→ Stanton T. Friedman
110 Kings College Road
Fredericton, NB E3B 2E7
Canada

Dear Stan:

We regret that you will be unable to make a presentation at the 1982 MUFON UFO Symposium in Toronto, however we understand the problems confronting you and your family. The well being of our families must be the prime priority. I am personally very concerned about the financial aspects of the meeting in Toronto, however as an international organization we must be considerate of our Canadian friends. The hotels in Canada charge extra for their meeting rooms, without regard to the number of people paying for lodging. This is a financial handicap to the host committee as compared to the United States.

I am sure that Joe Nyman, Treasurer for Massachusetts MUFON, has advised you for their plans to pay your expenses to M.I.T. MUFON will be the last to be repaid for financial advances made for this symposium--the speakers are first.

MUFON will soon be running out of copies of "The Zeta Reticuli Incident" by Terrence Dickinson that we purchased from you. We would like to continue to make this fine booklet a part of our available publications. We purchased 350 copies (one box) from you for \$225.00 originally. Please advise if you still have your large supply and the present selling price plus delivery costs to Seguin.

We were also disappointed when Terrence Dickinson could not accept our invitation to speak in Toronto for the MUFON symposium. There is considerable interest in attendance at the 1982 UFO Summit Meeting on Monday, July 5th in conjunction with the symposium. This will increase the number of out-of-town participants for the symposium. We have invited representatives of all organized UFO groups to meet in Toronto, so that we may start cooperating in our efforts to resolve the UFO enigma. There is an abundance of talent available, but sometime their work is counter productive due to petty bickering and personality clashes. If the few debunkers can unite, it is imperative that the positive Ufologists start working together for maximum results.

2

We hope that you will be able to adjust your plans so as to attend the symposium and summit meeting in Toronto. Bill Moore will represent the APRO Board of Directors, Sherman Larsen will be the NICAP representative, and Dr. Hynek will represent CUFOS, as starters.

Sincerely yours,

Walter H. Andrus Jr.

4 March 1982

Dear Walt:

This is a very difficult letter to write but it has to be done.

As you know I had accepted the invitation to present a paper at the MUFON meeting in Toronto this coming July. You may not know that I have had serious reservations about the meeting as expressed to Henry McKay last July. Briefly I was concerned about the meeting being held during one of the biggest holidays in both Canada and the US, the very high prices at the hotel, the supposedly limited number of seats at the hotel for conference sessions, the absence of a large committee to handle the myriad of details, etc. along with the difficulty in getting the general public to give up an expensive weekend of their time for a UFO symposium during a holiday. To this I might also add the obvious lack of a commitment to cover travel costs for speakers as manifested in Henry's Dec. 6 letter. In addition there has of course also been the difficulty in getting reimbursement for expenses in Boston... some of which were finally recently paid. Despite all the above I had intended to prepare a paper and attend the meeting... especially because I am in Canada and like the country...though I don't approve of taking advantage of speakers.

However, I must now rescind my commitment. Because of contacts made at the end of the year and a most unexpected turn of events or rather several of them I am suddenly back in the nuclear business at least for a while. I took a consulting job for Canatom to help in the commissioning of the Pt. Lepreau nuclear reactor located about 87 miles south of here. I leave home at 6:15AM and return at about 6:45PM when we don't stay over in St. John. In addition I have given several talks about nuclear power and have had to do a lot of catching up. Being a morning person I have been simply unable to get much done in the few evenings that have been available when I wasn't out of town keeping preexisting commitments. There is no way I can prepare a paper in the next few months. I regret this decision but the financial needs of my family are my first priority.

If the work is finished before July I might attend the symposium but I can't even commit myself to that at this time. I am truly sorry for any inconvenience this has caused. As you know I have worked very hard for the success of 7 symposia.

Wishing you well for the symposium,

Most cordially,

Stanton T. Friedman

CC Henry McKay
